3. Outlook

In these first nine months, profitability marked a significant increase over the same period last year with margins exceeding 12 percent in the third quarter.

The net financial position, excluding the impacts of IFRS 16 accounting standard, showed an important decrease from last year. The NFP/EBITDA ratio also continued to improve, as expected.

Demand in Asia Pacific and EMEA confirmed budget forecasts for the current year. The U.S. region showed signs of recovery in both fibers' product lines, despite the impacts of Hurricane Helene in North Carolina.

The fourth quarter is expected to see further profitability improvement, continued decline in debt, and increasing volumes, confirming the Business Plan.

The capital increase operation to support the Business Plan is expected to be completed by the end of the current year. If any rights remain unopted at the end of the subscription period, the final deadline to execute them will be January 31, 2025.
