Unique proprietary technology.

Same quality and performance as standard nylon without using new resources.

The ECONYL® Regeneration System

01 Rescue

The ECONYL® Regeneration System starts with rescuing waste otherwise polluting the Earth. like **fishing nets, fabric scraps, carpet flooring and industrial plastic** all over the world.

That waste is then sorted and cleaned to recover all the nylon possible.

04 Reimagine

Designers use **ECONYL® nylon** to create new products without ever having to tap new resources. That nylon has the potential to be recycled infinitely, without ever losing its quality.

03 Remake

ECONYL® nylon is processed into **yarns and polymers** for the Automotive, fashion, furniture and interior industries.

01 Rescue

02 Regenerate

Through a radical regeneration and purification process, the nylon waste is recycled right back to its original purity. That means **ECONYL® nylon** is exactly the same as fossil-based nylon.

Global and flexible footprint

allowing higher proximity to the clients, efficient logistic platform, diversified currency exposures, shorter delivery time, lower production costs and lower exposure to import duties and tariffs
