VOLUMES SOLD MAINTAINED IN THE USA AND ASIA

SLOWDOWN IN EMEA FOR
THE FIBERS MARKET

## ACHIEVEMENT OF PRODUCTION TARGETS OF THE ENGINEERING PLASTICS PROJECT BY YEAR-END

# TEMPORARY DECLINE IN MARGINS IN THE 2023 REPORTING PERIOD DUE TO THE HIGH UNIT VALUE OF THE INVENTORIES STOCKED IN 2022 COMPARED TO THE CURRENT MARKET VALUE OF RAW MATERIALS 

## DEBT CUTTING MEASURES CONTINUED

MAIN INDICATORS AT JUNE 30, 2023:

- Revenues: $€ 311.1$ million, $-11.4 \%$ compared to $€ 351.0$ million for the same period of 2022
- EBITDA: €31.3 million, $-\mathbf{3 9 . 2 \%}$ compared to $€ 51.5$ million for the same period of 2022
- Net Result: - $€ 4.1$ million loss, $-\mathbf{1 2 3 . 4} \%$ compared to a $€ 17.7$ million profit for the same period of 2022;
- NFP/LTM EBITDA ratio at x3.48 at June 30, 2023 compared to x2.69 at December 31, 2022.

Arco, August 31, 2023 - The Board of Directors of Aquafil S.p.A. [ECNL:IM] [ECNLF:OTCQX], chaired by Prof. Chiara Mio, met today and approved the Company's consolidated operating and financial results at June 30, 2023:

Giulio Bonazzi, Chief Executive Officer, stated:
"The first half of the year was marked by extreme volatility. As already announced in the first quarter and at the beginning of August, the context of reference was more challenging than expected.

In EMEA, there was a considerable slowdown of the end market, with an ensuing impact on the Group's volumes sold. Moreover, the high unit value of inventories stocked in the previous year, coupled with the strong reduction in raw material prices, led to a temporary, yet significant decline in margins.

In the United Stated and in Asia Pacific, demand generated satisfactory results, confirming the previous year's levels, despite the slight decrease in the US textile fibers sector.

The Engineering Plastics project progressed well and is expected to reach the targets set by the end of the year, with excellent growth potential for the future.

Important results were also achieved by regenerated and ECONYL® branded products. Volumes sold remained essentially in line with the first half of 2022, confirming their strong resilience.

The debt cutting measures continued to be an important objective that the Group keeps pursuing through actions aimed at rationalizing working capital and investments thanks to the conclusion of the cycle launched in prior years.

With regard to the second half of the year, Asia and the United States are expected to confirm a substantially stable market demand. In EMEA, the market of fibers for garments remains slow, with an expected recovery of volumes sold for fibers for carpets and polymers."

## Operating results at June 30, 2023

## Revenues ${ }^{1}$

Revenues amounted to $€ 311.1$ million at June 30, 2023, of which $€ 144.3$ million in Q2 2023, with an $11.4 \%$ and a $19.8 \%$ decrease, respectively, compared to the same periods of the previous year. The change was attributable to a reduction both in volumes sold, down by $10.7 \%$ and $11.9 \%$, respectively, compared to the same periods of the previous year, and in selling prices, as a result of their alignment to the lower prices of raw materials and other cost factors, mainly energy and transportation.
In detail, sales performance by geographical area and product line is reported below:

1) in the first half of 2023:

EMEA revenues amounted to $€ 165.1$ million at June 30,2023 , of which $€ 73.6$ million in Q2 2023, with a $19.3 \%$ and a $28 \%$ decline, respectively, compared to the same periods of the previous year. Volumes sold decreased by 17.9\% in H1 2023 and by 15.9\% in Q2 2023. An analysis by product line performance shows that:
a) the BCF product line decreased by $16 \%$ in H1 2023 and by $23.6 \%$ in Q2 2023 compared to the same periods of the previous year, fully attributable to a decline in volumes sold by 15.5\% in H1 2023 and by 12.9\% in Q2 2023;
b) the NTF product line dropped by $20 \%$ in H1 2023 and by $32.2 \%$ in Q2 2023 compared to the same periods of the previous year, fully attributable to a decline in volumes sold by 28.0\% in H1 2023 and by 31.1\% in Q2 2023;
c) the Polymers product line declined by 31.2\% in H1 2023 and by 37.8\% in Q2 2023 compared to the same periods of the previous year. Within this product line, Engineering Plastics volumes sold grew by over $200 \%$ compared to the first half of the previous year, whereas for other polymers volumes sold declined by $38.9 \%$ and $30.7 \%$, respectively, in H1 and Q2 2023.

In North America, revenues amounted to $€ 98.4$ million at June 30, 2023, of which $€ 48.4$ million in Q2 2023, with a 4.2\% increase and an 8.6\% decrease, respectively, compared to the same periods of the previous year. Volumes sold rose by $0.8 \%$ in H 12023 and dropped by $7.1 \%$ in Q2 2023. An analysis by product line performance shows that:
a) the BCF product line rose by $4.8 \%$ in H 12023 compared to the same period of the previous year, mainly attributable to an increase in selling prices and a $9 \%$ decline in the second quarter, compared to the same period of the previous year, chiefly due to a $9 \%$ reduction in volumes sold compared to the same period of the previous year;
b) the NTF product line decreased by $5.9 \%$ in H 12023 and by $8.9 \%$ in Q2 2023 compared to the same periods of the previous year, mainly due to the $13.6 \%$ decline in volumes sold in H1 2023 compared to the same period of the previous year, partly offset by an increase in selling prices and a $9.6 \%$ rise in Q2 volumes sold that was not supported by selling prices.

In Asia and Oceania, revenues amounted to €46.6 million at June 30, 2023, of which €21.8 million in Q2 2023, with a $7.8 \%$ and an $8.5 \%$ decrease, respectively, compared to the same periods of the previous year. The change was attributable to a decline in revenues reported by the Group company Aquafil Engineering, which offers engineering services, in addition to a slight reduction in the volumes sold of the BCF product line, down by $3.1 \%$ in H 12023 and by $6.7 \%$ in Q2 2023 compared to the same periods of the previous year.

Revenues from ECONYL® branded products accounted for $47.8 \%$ of revenues generated from fibers in the first half of the year and for $48.8 \%$ in the second quarter. This item rose by $2.4 \%$ in H 12023 and dropped by $5.8 \%$ in Q2 2023 compared to the same periods of the previous year. Both changes were attributable to selling prices.

## EBITDA

EBITDA stood at $€ 31.3$ million at June 30, 2023, of which €9.8 million in Q2 2023, with a 39.2\% and a $63.5 \%$ decrease, respectively, compared to the same periods of the previous year. EBITDA margin at June 30, 2023 was $10.1 \%$ compared to $14.7 \%$ for the same period of the previous year, whereas in the second quarter it was $6.8 \%$ compared to $14.8 \%$ in Q2 2022.
The reduction (approximately $€ 13$ million) was primarily due to the high unit cost of the raw materials stocked in 2022 and, to a lower extent, to the decline in volumes sold.

## EBIT

EBIT amounted to €4.1 million at June 30, 2023 and was negative for $€(3.9)$ million in Q2 2023, with an $83.3 \%$ and a $132.1 \%$ decrease, respectively, compared to the same periods of the previous year, fully attributable to the change in EBITDA.

## Net financial charges

Net financial charges amounted to $€(6.2)$ million at June 30,2023 compared to $€(0.4)$ million for the same period of the previous year. The result reflected the $€ 2.7$ million decline in financial income compared to the same period of the previous year, which had benefited from the positive effect of the fair value change in derivatives (IRSs), in addition to a $€ 3.6$ million increase in financial charges compared to the same period of the previous year, mainly as a result of higher interest expense on bank loans and borrowings. Moreover, exchange gains, which amounted to $€ 1$ million compared to $€ 0.5$ million in the previous period, had a positive effect of $€ 0.5$ million.

## Income taxes

Income taxes amounted to $€ 2.1$ million at June 30, 2023 compared to $€ 6.5$ million for the same period for the previous year. The change reflected the decrease in profit before taxes, which went from $€ 24.1$ million to $€(2.1)$ million, as well as the effects of deferred taxes.

## Net result

Net result was a $€(4.1)$ million loss at June 30,2023 compared to a $€ 17.7$ million profit for the same period of the previous year.

## Consolidated capital and financial highlights at June 30, 2023

## Investments and acquisitions

At June 30, 2023, net investments - excluding those recognized in application of IFRS 16 amounted to $€ 18.4$ million compared to $€ 16.2$ million for the same period of the previous year. They mainly focused on activities aimed at stepping up industrial and energy efficiency at the Group's plants, in addition to increasing the production of ECONYL® caprolactam and its raw materials and the development of circularity technologies.

## Net working capital

At June 30, 2023, net working capital decreased by $€ 22.2$ million. Said change was chiefly attributable to the $€ 42.8$ million reduction in the value of inventories, due both to the decline in the unit prices of raw materials and in other cost components, in addition to the decrease in the volumes of raw material inventories.
This change was partly offset by lower trade payables for $€ 21.8$ million.

## Net Financial Position

The Group's net financial position amounted to $€ 250.7$ million at June 30, 2023 compared to $€ 247.9$ million at December 31, 2022. Said change was due to the positive cash generation of operating activities for $€ 28$ million, the decline in working capital for $€ 22.2$ million, the change in other assets and liabilities for $€ 4.6$ million, net investments for $€ 18.4$ million, the payment of financial charges, taxes and the use of provisions for $€ 13.3$ million, the non-monetary change relating to the application of IFRS 16 for $€ 4.1$ million and the payment of dividends amounting to $€ 12$ million, as well as the purchase of treasury shares for $€ 0.6$ million.

At June 30, 2023, the NFP/LTM EBITDA ratio was $\times 3.48$ compared to $x 2.69$ at December 31, 2022.

## Outlook

In the second quarter, the EMEA market showed a strong contraction, whereas demand in other geographies remained essentially in line with the same period of the previous year.

In addition to this, Europe witnessed a swift decline in the Group's main raw material, whose price decreased by nearly $30 \%$ since year-start. This decline led to a mismatch between the market prices and unit values of inventories stocked in 2022, with a temporary, yet significant impact on the Group's margins.

With regard to the second half of the year, Asia and the United States are expected to confirm an essentially stable market demand. The EMEA market remains extremely slow, particularly
with regard to fibers for garments, with an expected recovery in terms of volumes sold of fibers for carpets and polymers. In the engineering plastics market, demand is recovering overall, which will allow the Group's new product line to reach the targets set by the end of the year.

Within this context, the Group continues its important debt cutting measures launched in 2022, in addition to actions aimed at reducing costs. It bears recalling that the level of debt and margins is constantly monitored so as to be able to adopt adequate measures, where necessary.

## Appointment of the President of the Audit, Risk and Sustainability Committee

The Board of Directors of Aquafil S.p.A. today appointed Patrizia Riva as new President of the Audit, Risk and Sustainability Committee.

## Significant events occurred in the first half of 2023

## Distribution of dividends

On April 27, 2023, the Ordinary Shareholders' Meeting of Aquafil S.p.A. resolved to distribute dividends of approximately $€ 12$ million, which were paid out on May 10, 2023.

## Acca S.p.A.

On January 18, 2023, through the subsidiary Aquafil Chile S.p.A., a joint venture was formed with Atando Cabos S.p.A. under the name ACCA S.p.A., with registered office in Santiago (Chile) and share capital of CLP 1 million with the purpose of purchasing, storing and recycling fishing nets, nautical ropes and other plastic waste materials. The company has not yet entered into operation.

## Purchase of treasury shares

As regards the plan for the buy-back of treasury shares approved by the Shareholders' Meeting on October 20, 2021, it should be noted that in January 2023 Aquafil continued to purchase treasury shares reaching a total of $1,278,450$, equal to $2.4961 \%$ of share capital.

## Karun World LTD

In May 2023, the interest in Karun World LTD, with registered office in Warwick, UK, was recognized for $€ 150$ thousand, equal to $1.83 \%$ of share capital. The company specializes in the production of eco-sustainable eyewear from waste materials, such as nautical ropes or fishing nets, collected in the Patagonian coasts and mountains.

Declaration of the appointed manager
"The Manager responsible for preparing the Company's financial reports, Roberto Carlo Luigi Bobbio declares, pursuant to Paragraph 2 of Article 154-bis of the Consolidated Finance Law, that the accounting information contained in this press release corresponds to the company's records, ledgers and accounting entries."

This press release contains forward-looking statements. These statements are based on the Aquafil Group's current expectations and projections regarding future events and are, by their very nature, subject to a number of risks and uncertainties. These statements refer to events and depend on circumstances that may or may not occur or take place in the future, and, as such, undue reliance should not be made on them. Actual performance could differ significantly from the contents of such statements due to a variety of factors, including constant volatility and a further deterioration of capital and financial markets, changes in macroeconomic conditions and economic growth and other changes in business conditions, changes in the law and institutional context (in Italy and internationally), and many other factors, most of which are beyond the Group's control.

Aquafil is a pioneer in the circular economy also thanks to the ECONYL® regeneration system, an innovative and sustainable process able to create new products from waste and give life to an endless cycle. The nylon waste is collected in locations all over the world and includes industrial waste but also products - such as fishing nets and rugs - that have reached the end of their useful life. Such waste is processed to obtain a raw material - caprolactam - with the same chemical and performance characteristics as those from fossil sources. The polymers produced from ECONYL® caprolactam are distributed to the Group's production plants, where they are transformed into yarn for rugs carpet flooring and for clothing.

Founded in 1965, Aquafil is one of the main producers of nylon in Italy and worldwide. The Group employs over 2,800 people, at 20 production sites located in nine countries and in four different continents, more precisely in Italy, Slovenia, Unites States, China, Croatia, Scotland, Thailand, Australia and Japan.
