Outlook

2025 saw a very strong performance compared to the previous year, especially in terms of margins.

FY 2026 will focus on rationalizing costs, consolidating margins, and increasing volumes in key businesses. The Group will continue to benefit from the cost rationalization plan, with a positive impact expected in terms of profitability over the coming quarters. The main financial management goal will be to continue to pursue deleveraging and cash flow optimization.

The macroeconomic backdrop of recent weeks calls even more for constant market monitoring. Our global presence and distinctive positioning in ECONYL® brand regenerated fibers enable the Company to look to the future with confidence, focused on sustainable growth and the progressive strengthening of market leadership.
